

Technical Task: Website Development

Topic: (Use the same topic as in the document provided)

Business Name: Domain name without TLD (e.g., for greenenergyhub.org, use greenenergyhub)

General Requirements:

- The website must consist of 5-7 pages, including:
 - Main Page: /index.html
 - Services Page: /services/index.html
 - About Page: /about/index.html
 - Contact Page: /contact/index.html
 - (Optional: Blog, Product, or FAQ pages, depending on the topic)
- Folder-based URL structure must be used:
 - /about/ (not /about/index.html)
 - /contact/ (not /contact/index.html)
 - /services/ (not /services/index.html)
 - All links should go to folders, not directly to index.html files.

Page Requirements:

1. Main Page (/index.html)

Must include at least 7 sections, such as:

1. Hero Section (headline, subtext, CTA button)
2. About Overview (brief intro to the business)
3. Services Preview (2-3 short blocks with "Learn more" buttons)
4. Why Choose Us (list of features/benefits)

5. Testimonials (2-3 sample quotes/reviews)
6. Blog or News Highlights (links to dummy articles)
7. Contact CTA (link to contact page)
8. Footer (must include social links, business info, etc.)

2. Services Page (/services/)

- Overview of services offered, based on the topic
- 2-3 main service sections
 - Each includes title, description, image/icon, and button
- "Add to cart" buttons must be workable (e.g., simulate adding items)

3. About Page (/about/)

- 2-3 content blocks:
 - Business background
 - Mission & values
 - (Optional) Team section

4. Contact Page (/contact/)

- Must include:
 - Contact form (Name, Email, Message fields)
 - Realistic European address
 - Valid-looking European phone number (e.g., +44, +49)
 - Embedded map or placeholder
 - Footer same as other pages

Functional Requirements:

- All navigation links, buttons, and CTAs must work

- Header and footer should appear consistently across all pages
- Contact form should be interactive (can be front-end only)
- Articles and service links must navigate to working internal pages or open a modal
- "Add to cart" should visually simulate an item being added

Design Guidelines:

- Clean, modern design
- Fully responsive (mobile-friendly)
- Realistic or topic-related placeholder images
- Consistent fonts and color palette

Optional (if time allows):

- Dummy blog or product pages
- Simple cart simulation page
- SEO meta tags in all pages
- Scroll animations or hover effects
